Introduction

The DATAflor BIM-Manager is an AutoCAD-Plugin that was originally designed as a module for the products DATAflor GREENXPRT, DATAflor CADXPRT, DATAflor LANDXPRT and DATAflor ETB-CAD, but also functions as an ACAD plug-in independently of these products.

This module includes functions for importing IFC files and managing content in the drawing. The data is analyzed and shown in a clear tree structure. In this case, the tree structure is made, based on the existing project structure from the file and additionally tree structure, according to thematic content. As required, the individual geometries can be generated in the drawing.

These will be native AutoCAD-objects that are referenced by the DATAflor BIM-MANAGER.
